“ Vina Mamaron For one thing I am very upset that you would choose a public venue like this to put anything negative about my brother at a time like this! Having said that YOU were the reason that he turned the way he did with you cheating on him and treating him bad. Every time he wanted to see Karen in Florida you made it clear if he stepped foot there you would have him thrown in jail. I don't appreciate your comments or carricter assatination. My brother was a good person until you got your claws into him. Leave us alone and leave us at peace!!!
