“ I loved visiting Nellena. We talked about so many things, including her being able to fly small engine planes and her family living in the same house for 70+ years. We grew very close in a short amount of time. I'll miss her so much. Jack and Rosie, you took such good care of her. I'm glad I got to know you as well.

I often visited Nellena and Gene's house with several classmates during my high school years in the late 1950s. A classmate was dating their daughter and several of us would visit to take in the expertise of Gene using his amateur radio. Nellena would always welcome us as part of the family. She is one of the most thoughtful people I have come across. I, along with many others, will miss her.
